Brick & Coal Girl Footballers Entertain

Held Banquet and Social Evening Last Friday

An event of a very novel nature was put on in the I. O. F. hall last Saturday evening by the Brick & Coal girls' football club when they entertained the men's club and the officials and supporters of both clubs to a banquet and social evening.

So genial and well known to each other were the sixty guests who sat down to the banquet that the gathering was just like one big family reunion and this spirit prevailed during the entire evening.

A most delicious dinner was served in which their training on the field made the girls most efficient waitresses. After all were seated, the forwards attacked with piping hot potatoes and meats and were ably supported by the half backs who worked well up the table with all the trimmings. After a slight lull, in which there was some nice combination (sals) and quick passing, the backs relieved by coming forward. Just the line of pies which tickle the palate of a well-seasoned appetite most. Up to this point the goalie had very little to do but she again brought the forwards into action by leaving the goal and bringing with her steaming hot kettles of tea and coffee, reminding the fact that the game was still in progress.

Referee C. Buchholz, at the head of the table, then called time and proceeded with the next part of the program. He complimented the girls, not only for their prowess on the field but also for their ability as hostesses and proficiency in the culinary art. Among the fans who were called upon for a few remarks were Mayor Woots, E. L. Stone, and H. Champ. All congratulated the girls on the success they had made of their new line of cut-out sport and complimented them for the successful manner they had provided for evening's entertainment.

Reference was also made to the splendid showing made by the company's men's team which had won three cups last season. Mrs. Stone was also called upon by the chairman. In looking over the girls' line up Mrs. Stone said she was especially interested in every one of them as they had all passed through her hands at school, and she was glad to know her girls were making a name for themselves along the line of good wholesome sport. She assured the girls that she was at their service for anything she could do to help them at any time. Geo. Thomson, A. E. Shaw and Miss Buchholz replied for the plant teams, thanking the previous speakers for their kindly remarks and the fans generally for their support and encouragement in the past.

The program was liberally interspersed with songs from E. L. Stone, G. Cook, A. E. Shaw, R. Math and Geo. and Tor Davies.

At the conclusion of this part of the program tables and chairs were removed and dancing was the order of the evening till (Continued on Back Page.)

Dramatic Festival Next Friday Night

Reserved Seats Selling Fast For Big Show

Judging from the advanced sale of tickets for the final dramatic festival of the season, the Cameo Theatre is again going to be filled to capacity when there is a large congregation on next Friday evening. Already there has been a heavy demand for reservations both from Redcliff and Medicine Hat so those wishing to secure a choice seat should lose no time in purchasing a ticket. Patrons are reminded that there are no rush seats this time so that theatre-goers can arrive at the theatre any time after the doors open at 8 p. m. and be assured of finding a seat. The curtain rises at 8:30 sharp.

Three judges from Medicine Hat will be on hand to pick out the champion orators of the public and high schools.

The play, "Keeping up Appearances" by the Rebekahs, shows the delapidated home of Mrs. Botherham (Mrs. Kelleth), in order to cure her husband, (B. Allison) of his insatiable thirst she allows Silas Winch, (E. T. Cooke) to give him the fright of his life. The plot gets under way quickly and is a scream from start to finish.

The setting of "The Valiant" is the warden's office in a state penitentiary. A person who calls himself James Dyke (W. King) is under sentence of death and has only thirty minutes more to live. Despite the efforts of the warden, (E. L. Stone) and the prison chaplain, (M. Stewart) Dyke refuses to reveal his real identity and for the sake of his mother prefers to go to the gallows under the assumed name. A girl, (Miss Viva Cox) gets permission from the governor to interview Dyke. She thinks he may be her long-lost brother and put him to the crucial test. He holds. The prison jailer is W. Hill and the attendant T. Balmer.

RIFLE ASSO. SCORE

The following are the scores for the silver and bronze medal shoot held at the local armory last Saturday:

1. J. Amadahl, 140; B. F. Woodcock, 137; R. Stratton 131; Y. Lawson, 128; T. Podest, 128; A. E. Shaw, 127; E. L. Shuman, 127; B. Moore, 126; E. Fairhurst, 125; A. Bastien, 122; W. Lawson, 116; R. Fairhurst, 116; E. W. Lawson, 115; N. Lenning, 115; R. List, 115; H. Lawson, 111; N. Willis, 111; J. Spence, 111; W. Balmer, 110; G. S. Cook, 102; M. Collard, 97; W. McClary, 89; C. Bergeron, 20.

The Silver Medal won by L. of the Bishop: Tedy Lawson, Robert Wilson, Norman Ross, Al won by R. Stratton.

Any person wishing to join the association may do so upon payment of \$1.00 yearly dues.

B. F. Woodcock, Secy. Treas.
Per L. J. A.

LOCAL CLINIC TO MEET NEXT WEDNESDAY

The local clinic will meet in Gordon Memorial school room on Wednesday afternoon, Feb. 2nd at 2 o'clock.

Bishop of Qu Appelle Here Last Sunday

Administrative Confirmation in St. Ambrose Church

The ancient and impressive liturgy of the Church of England, with its beautiful phraseology and dignified ritual, was enjoyed by a large congregation in St. Ambrose Church last Sunday evening, when the Right Rev. the Lord Bishop of Qu Appelle, administered the rite of Confirmation to a class of five candidates presented by the vicar. Preceded by a shortened form of evensong, culminating in the singing of the Magnificat, the order of confirmation opened with the presentation of the candidates by the vicar, followed by the prescribed admonition in the prescribed form. Prefaced by hymns and the reading of the lessons proper to the occasion, the Bishop addressed the congregation on the subject of "Discipline in the Spiritual Life," basing his remarks on St. Paul's analogy of the athlete in the 9th chapter of his first Epistle to the Corinthians. His Lordship stressed the necessity for constant training and discipline in spiritual things if we are to win the crown awarded to those who run the straight race, and at last to the goal of everlasting life. Following the address the Bishop, seated in his chair in the chancel, laid his hands in solemn benediction on the candidates, one by one, confirming them in the fruits of the Spirit received in baptism. The final prayers and the benediction pronounced by the Bishop in his cope and mitre, with his pastoral staff in his hand, brought to a close the impressive and solemn service.

Owing to the necessity of catching the train for the east the Bishop was unable to meet personally any members of the congregation, but he demonstrated his extraordinary memory by asking about many of them by name, some of whom he had not met for several years. He showed a sympathetic interest in the affairs of the parish and was particularly anxious to learn about conditions in Redcliff at the present time. He assured the vicar that the Church in the east would continue its generous help to the distressed areas in the west, as long as that help should be needed. Over \$11,000 had already been distributed in this connection and thousands of bales of clothing have been sent into the Kingdom and Alberta.

The following candidates received confirmation at the hands of the Bishop: Tedy Lawson, Robert Wilson, Norman Ross, Al won by R. Stratton.

Mr. Chas. Kemp had the misfortune to break the bone in one of his fingers while at work last week.

Mr. R. S. Hodge is in Edmonton this week on business in connection with the Dominion Glass plant here.

This is subscription renewing time. Look at your label.

Local Legion Members Entertained at Hat

Return Contest Billed For Here Next Wednesday Evening

Last Tuesday evening twelve members of the local Legion were guests of the Medicine Hat Legion in a series of impromptu games of a most friendly nature. Billiards, rummy, cards, and other games were played to the whole the competition broke even. Medicine Hat won in billiards and rummy, the Redcliff contingent won a successful carpet ball and cribbage.

The local boys report a most enjoyable evening and say that the Hat club members are real hosts.

Arrangements are now under way to have a return contest in Redcliff on Wednesday evening next and the local entertainment committee, under the chairmanship of Bill Yates, is finalizing a complete program for the occasion.

Successful Burns' Concert Held Here

Put on By Ladies' Aid of Gordon Memorial Church

The Burns concert in Gordon Memorial church last Monday evening, put on by Mrs. Balmer with the assistance of Mrs. Cairns, under the auspices of the Ladies' Aid, drew a large audience, whose appreciation was shown by the hearty applause given to all numbers, and nearly all responded with encores.

The following program was rendered: Quartette, "Afton Waters" Miss Pow and Maskell; Madams Balmer and Cairns. Song, "Who's Tell me Where's Janet Pritchard" Adair, "The Immortal Memory" Rev. R. E. McKinnon; Song, "Scottish Blue Belle" Mrs. Balmer; Chorus, "The Kilted Lads" eight boys in kilts; Recitation, "The Work Basket," Mrs. Thacker; Song, "Annie Laurie," Sam McClary. Here during an interval of half an hour, Mrs. Cairns played a selection of Scottish airs while the ladies served hot dogs and coffee. Song, "Twenty Thousand Scotchmen," eight boys in kilts; Reading, "The Patriotic Society," Mr. Cyrus G. Pow; Song, "MacGregor's Gath ering," Miss Nellie Morrison; Quartette, "Robin Adair," Misses Pow and Maskell, Madams Balmer and Cairns; Song, "Loch Lomond," Mr. B. Thacker; Chorus, "Auld Lang Syne," by the audience, God Save The King, Miss Jean Pow was the accompanist for the quartette. Rev. Pow acted as chairman.

STATEMENT FOR THE BRICK AND COAL DANCE

The following is the financial statement for the Brick & Coal men's football whist drive and dance held on Dec. 18th 1931:

Receipts for day	\$39.35
Expenses	
Dutton's Orchestra	\$15.00
I. O. O. F. Hall, rent	8.50
E. T. Cooke	2.20
Refreshment	2.00
Mrs. Shaw, cake	4.00
Paid Jan for Girls	7.40
Outstanding ticket	75
Total	\$39.35

Last Meeting of the Present Council Held

Mayor Thanks Members For Co-operation During Year

The last session of the present town council was held last Monday evening with a full council present.

The by-law appointing Frank Baird returning officer for the municipal elections to be held on Friday, February 8th, between the hours of 10 a. m. and 7 p. m., was given its several readings and passed.

A letter was read from Mrs. Van Wert notifying council that she had met with an accident on town streets and was holding council responsible for her expenses. The letter was left in abeyance until referred to the insurance company.

Explanation was made regarding the shortage of water a few weeks ago, to the satisfaction of council.

When the bill was presented from the Riverside Iron Works for repairing on pumps, it was moved by councillors Hargrave and Shaw that this company be notified that the pump was not in running order when returned from their plant.

An application for direct relief was granted for \$12.00 month same to be submitted to government for approval.

On motion of councillors Hargrave and Shaw the secretary was instructed to engage Cliff Hall for the ratepayers' meeting on the evening of February 1st. The mayor explained that he had taken steps to secure further funds for relief work in town. He said a government official had inspected work done at the pumping station and had expressed satisfaction the work done so far and would recommend to the government that the work be completed. He had also received from the provincial government assurance that they had approved of the completion of this work.

On motion of councillors Hargrave and Shaw a vote of thanks was tendered to the Dominion Glass Co. for their valuable assistance in helping make repairs to the pumps at the pump station.

His Worship reminded the councillors that this was the last meeting of the present council and he wished to thank the councillors for their co-operation during their term of office, despite the fact that they had passed through some trying times during the past year. He said there would still be important matters with which the council would have to deal during the coming year and he hoped the best timber possible would be secured for the next council.

Town Hockey Team Loses Last Two Games

Played Hat Teams Here Last Saturday and Sunday

During the past week two hockey games were played in the local ice and although the town team showed considerable improvement over the previous years, they went down to defeat on both occasions. The first game was played over.

St. Ambrose S. W. A. Has Successful Year

Annual Meeting Held Thursday January 14th

A successful and happy year for St. Ambrose S. W. A. closed on Thursday Jan. 14th at the Parish Hall. The reports from every officer were read and found very encouraging.

On the whole the sum of \$556 was raised, and owing to the fact that it has been a very strenuous year this was considered very good. The number of members have increased to seventy-one (71) and all have a good time working together. The officers elected are as follows:

President—Mrs. A. Rose.
Vice Pres.—Mrs. K. Johnson.
Sec. Treas.—Mrs. Tanner.
Jr. Sec.—Mrs. Grieve.
Assistant—Mrs. Farrhurst.
Little Helpers Sec.—Mrs. H. Johnson.
Dorcas Sec.—Mrs. Bainbridge.
Thank-Offering Sec.—Mrs. Ed. Ellis.
Living Message Sec.—Mrs. Vogstadt.

Visitors for the Sick—Mrs. Ellis and Mrs. K. Johnson. Rev. Stewart gave a very encouraging address on the success of the society in such a strenuous year, and presented the retiring president and secretary with a pretty cake plate and hand painted framed picture. A substantial tea was afterwards served by Mrs. Vogstadt and Mrs. Tanner.

Churches

GORDON MEMORIAL UNITED CHURCH

Pastor Rev. H. Erskine Pow
Sunday, January 31st, 1932
10 a. m. Church School.
11:15 a. m. Morning Worship.
Subject: "The Vine and the Branch." Lecture I.
7:30 p. m. Evening Worship.
Subject: "Best Gifts."
A New Year: Another opportunity for lofty thinking and nobility.

MARY'S CHURCH

Celebration of Mass every Sunday of each month except the first Sunday, at 8:30 a. m.

ST. AMBROSE CHURCH

Rev. Malcolm Stewart, vicar
On Sunday evening next, Jan. 24th, the services in St. Ambrose will be at 7 a. m. of 7:30 a. m. Holy Communion.
10 a. m. Sunday School.
1st and 2nd Sunday.
11 a. m. Choral Eucharist.
2nd, 4th and 5th Sundays.
11 a. m. Mattins and sermon.
7:30 p. m. Evensong and sermon.

Last Saturday when the school teacher at Suffield got a team together in the Hat and gave the boys here a game. The play was not long in progress until it was seen the visitors were superior in both speed and stick handling, and won out easily. A team from the Hat city league played here Sunday and they, too, vanquished the local lads. In both games, however, the boys put up a good argument and convinced the fans that they will have to be more alert with before the season is over.

MACARONIS

with ZIG-TAG papers attached

Marconi's Great Achievement

Millions of the earth's inhabitants sit in homes, offices, hotels, clubs, in railway trains and on ships, December 22, 1931, and enjoy one of the most marvelous demonstrations yet known in an age of marvels. People of many races, black and white and yellow, speaking a veritable babel of languages, and of many creeds were, for the time being, brought together as one great family to enjoy an entertainment to which fifteen nations contributed and in which all participated.

The event was a world-wide radio hook-up to commemorate an achievement of thirty years ago which has revolutionized methods of communication, transformed social conditions, altered our forms of entertainment and instruction, and been the means of saving countless numbers of lives.

Thirty years ago, (December 12, 1901), at noon, a young man, young Marconi, imbued with the enthusiasm and confidence of youth, sat in an old shack on Signal Hill, Newfoundland, and waited patiently for something to happen; something which, to the knowledge of man, had never before occurred. He was Marconi waiting to convince an incredulous world that it was possible to send a signal across the Atlantic Ocean by wireless telegraph. Marconi and two assistants waited until in the earphones they heard at the appointed minute the "click, click, click," the three dots of the letter "S" in the Morse Code, which had been the signal agreed upon to be sent from Poldhu, Cornwall, England.

From that historic moment to December 12, 1931, the world had been constantly growing smaller—time and space were eliminated. The presence of a key eighteen hundred miles away had been heard in the merest fraction of a second. In the thirty years which have passed, vast strides have been made in wireless communication, but no wireless message has crossed the Atlantic any faster than that first one of Marconi.

Today we sit in our homes before our radio sets and by the simple turning of a dial bring ourselves from the music and speech of New York to that of San Francisco; from the music of New Orleans to that of Mexico, or, as on December 12, we listened to speech and music from London, England, then Brussels, then Paris, Berlin, Rome, Warsaw, New York, Washington, Ottawa, Java, Hawaii, Venezuela, Brazil, the Argentine. We heard a message being transmitted from New York to San Francisco, from whence it was sent to Java, then to Amsterdam, and we heard it being received back in New York after circling the globe in one minute and 47 seconds. We heard English, French, German, Italian, Spanish, Japanese and other languages spoken.

All because Marconi's great experiment of December 12, 1901, succeeded. The world was astounded then; it marvels still. Following that first great came the development of wire telegraphy, then wireless telegraphy was made possible by the invention of the vacuum tube, and now television is just around the corner. The vacuum tube led to the discovery of the photoelectric effect, that marvelous scientific principle which made talking pictures possible, which opens and closes doors, counts vehicles on the highways, and does many other most astonishing things.

Airplanes are guided by wireless as they wing their way through space; the wireless "dog" gall brings help to stricken ships; the radio summons medical or other assistance into the far frozen north; His Majesty the King addresses his people in every portion of his far-flung Dominions; church services and the finest of the world's music and other forms of entertainment are carried into the most isolated of remote homes.

But no one listened on December 12, 1931, to the nations talking to and entertaining each other, switching from one continent to another almost as quickly than the mind can think, the conviction grew that, great as all these achievements are, something even greater and grander must inevitably result from Marconi's amazing experiment. Will not this assimilation of time and space, this development of barriers of communication between peoples and nations, this development of a common means of expression between people, also lead to the breaking down of old superstitions, prejudices and jealousies? Shall we not learn to discard the old, mis-used word "foreigner" and, instead, come to regard those who wear other flags, who speak languages other than our own, and who worship at altars some what different from those at which we worship, as neighbours, friends, and brothers?

In honoring Marconi for his great achievement, may we not also hope that over and above all the material benefits he thus conferred upon us, he has been an effective instrument in the hands of an all-wise Providence in promoting the brotherhood of man and the federation of the world?

An Expensive Position

Necessary For London's Lord Mayor To Have Private Means

The city of London allows its Lord Mayor £10,000 for expenses, which normally amount to about £25,000. Banquets, luncheons, civil entertainments and the charities account for a considerable part of this sum. The Lord Mayor can count upon at least three public functions in every two days and he has to make a speech, with few exceptions, at each. He works hard and his public luncheons and dinners mainly consist of watching other people eat. At the end of the year there is usually a baronetcy awaiting the Lord Mayor. Sometimes a peerage.

A Valuable Industry

The oilfield is the principal source of raw material of the pulp oil industry in British Columbia, accounting for a production of over 3,500,000 gallons of oil in 1930. The area is 600 tons of pitchblende, most commercial products valued at \$1,360,000.

The only book possessed by Eskimos of Labrador, printed in their own language, has been the Bible.

Australia Making Macaroni

Formerly An Importer Country Is Now Exporting It

Carrying 1,000,000 tons of spaghetti and macaroni, the steamer "Albatross" sailed recently from Australia for the United Kingdom. This shipment is the first of its kind of major proportions to be sent to Britain and marks a bid by South Australia to capture the British market, whose annual requirements exceed 5,000 tons. The growth of the pasta industry follows the successful growing of a suitable red wheat in South Australia. Australia previously had been an importer of macaroni.

Know Your Own Country

Canadians have been spending their money in foreign lands, in a much larger degree than formerly. The depression has also done much good if it has taught them to know their native land better than they did. The argument that travel is broadening, informative, and cultural ground, that does not mean that it is a good thing for anybody to neglect their own country in order to learn about others.

Her Heart Was So Sad Couldn't Be Housework

Mrs. B. Dragan, 8, N. 2, Midland, Ont., writes: "I had been troubled with heart trouble for many years. My heart would beat so fast I could hardly sit down. I had headache and sleepless nights. I couldn't get my housework done. I was so weak. I took three boxes of Milburn's Heart Pills and felt much better, and now I would not be without them in the house."

Price 50c a box

Sold by all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Communist Towns in Russia

Where Children Are Educated and Family Life Destroyed

On the East side of the Ural, in the neighborhood of the enormous deposits of the so-called Magnet Mountain, a communistic town will arise in the middle of the Steppes. The town will be given the name of Magnitogorsk, and will have a population of 200,000. The town was built in 1927. The Frankfurt architect, Mr. E. May, has drawn up the plan. It will be built on a spacious scale, with many parks. The Russian Peoples Communist Party has been working for the destruction of the family and the creation of the collectivist man and woman. Cooking will take place in a central kitchen and the meals eaten in common. Towns of this nature, but on a smaller scale are in Stalingrad and Soerov, near Moscow.

Worms, however, generated, are found in the digestive tract, where they set up disturbances detrimental to the health of the child. There can be no comfort for the little one until the intestinal intruders have been expelled. An excellent preparation for this purpose can be found in Worm Powders. They will immediately destroy the worms and correct the intestinal malfunctions.

Recipes for This Week

(By Betty Barclay)

SCALLOPED OYSTERS

- 25 oysters with liquor.
- 2 cups bread crumbs.
- 1 cup milk and cream.
- 2 tablespoons butter.
- 1 teaspoon salt.
- 1/2 teaspoon pepper.
- Grease baking pan and cover bottom with bread crumbs; lay oysters in carefully; season and cover with bread crumbs; pour over milk, oyster liquor and cover top with butter. Bake in hot oven at 425 degrees Fahrenheit about 20 minutes.

LEMON MINCEMAK

- 4 lemons.
- 3 apples.
- 1/2 cup currants.
- 1/2 cup raisins.
- 1/2 cup chopped nuts.
- 1/2 cup melted butter.
- 2 cups sugar.
- 1 teaspoon salt.
- 1 teaspoon ground cinnamon.
- 1 teaspoon ground nutmeg.
- 1 teaspoon ground cloves.
- 1 teaspoon ground ginger.
- 1 teaspoon ground allspice.

Wash apples, peel and remove seeds and cook till soft. Put through meat-pestle and then rub through a sieve. Add chopped apples and remaining ingredients, mix well and store in jars. Use as a filling for turnovers and pies.

Asthma Cannot Last when the greatest of all asthma specifics is used by the patient. The remedy has been used by thousands of cases which other preparations had failed to benefit. It brings help to even the most severe cases and brings the patient to a condition of blessed relief. Suffering from asthma is needless when a remedy like this is so easily secured.

Doing Welfare Work

Chesholovskaya Has Established Shelters For Jobless Boys and Girls

News comes from Chesholovskaya that its Ministry of Social Welfare has ordered the establishment of twelve cities of shelters for unemployed boys and girls 14 to 18 years of age. A government appropriation has been made to aid the work, but each city is responsible for providing quarters, fuel, and lights. These shelters offer warmth, food, and recreation during the day, and instruction in personal hygiene and other subjects.

Know Exactly

Commander—"Now, suppose you are on your post one dark night suddenly a person appears from behind and wrags the trigger around you so that you can't see your rifle. What would you call that?"

Cadet—"Let go, honey."

Arkansas Gazette: A scientist says it is the lower part of the face, not the eyes, that gives away one's thoughts. Especially when one opens the lower part of his face.

RECENT PORTRAIT

For "White Collar" Population

Above is a reproduction from a recent portrait of Stephen Leacock, noted Canadian economist. Mr. Leacock is connected with McGill University, Montreal.

Hospital Ties New Idea

New York Institution Has Lower Rate For "White Collar" Population

A "white collar" unit has just been opened at Mount Sinai Hospital in New York. The cost of private hospitalization in this unit will be about one-half of that now charged throughout the city. A peculiar need is intended to be met.

"White collars" adore a large and useful but generally neglected element in the population. They surround the stones of poverty, which must accept charity, and the upper strata of wealth, which does not have to. The men and women who wear them have neither money power nor the power to make laws, but they are the backbone of the nation.

Should Be Effective

British Will Submit Iraq Natives With Voice From Air

Broadcasting apparatus has been installed in Vickers-Victoria transport aircraft for experimental use among the natives of Iraq, the British Air Ministry announces, according to a special bulletin from London to the New York Times.

It is believed that the personal contact of a voice from the sky speaking the native tongue will be a more effective medium for reaching the natives than the printed word disseminated by leaflets and pamphlets. It also suggested as a feasible means for subduing rebellious tribesmen.

Old Coin Still Working

English Crown Dated 1677 Is In Fine Condition

At an English bank recently a man was given with some change a King Charles II. crown. The coin was given by mistake as a four-shilling piece, and had been paid in as such. Apparently both the bank and its client had been deceived by the similarity of the design on one side of the coin with that of the present-day coin. The crown, which dated 1677, is in fine condition, the King's head being very well defined.

An Unnecessary Loss

Operation of Criminals Cost United States Billions Yearly

The American Bankers' Association has estimated that this country's direct financial loss through operation of criminals annually amounts to the sum of \$3,956,672,000 for the next fiscal year.

Latest compilation by the association places this loss at \$3,956,000,000, whereas \$3,956,672,000 has been estimated as the cost of the Federal Government for the next fiscal year.

Chinese Boycott Aps

The national committee of Ontario in Kitchener, Ontario, in addition to sending money home for the purchase of airplanes for the Chinese army, are destroying everything that has its origin in Japan. An one Celestial put it, "these we have but all of Japanese clothing and food have been burned all up. We buy nothing Japanese no more."

Was Missing Contest

Probably the oldest newsdemon in England is Mrs. Robert Moon, mother of Countess Ferrers, who recently received congratulations from the King and Queen on reaching her 100th year. A few weeks ago Mrs. Moon entered a knitting contest for women over 70 and carried off first prize, her work being given 100 per cent.

Columbia will regulate food prices.

Winners Of Peace Prize

Nobel Award Goes To Jane Adams and Dr. Nicholas Murray Butler

The Nobel Peace Prize for 1931 was awarded to Jane Adams, Chicago social worker, and Dr. Nicholas Murray Butler, president of Columbia University, the co-general of Norway announced.

At a meeting of the Nobel Institute at Oslo, Norway, Professor Fredrik B. Breda, president of the Norwegian Committee of the Norwegian parliament, announced each would receive one-half of the amount of the prize.

The amount of each prize varies with the income from the fund established under the will of A. B. Nobel. In recent years the amount has been in the neighborhood of \$40,000.

United States citizens who have previously won the peace award are Theodore Roosevelt, in 1906; Elihu Root, in 1912; Woodrow Wilson, in 1919; Ambassador Charles G. Dawes, in 1925; and former Secretary of State Frank B. Kellogg, in 1929.

Dr. Nathan Söderblom, Archbishop of Uppsala, received the peace prize in 1920, when the Nobel awards approximated \$46,000 each.

Troubles Of Business Men

Frogs Take Place Of Money In Trade

Dr. George Beharrell, prominent industrialist, of London, England, described how a business deal was put through with frogs used for money.

"One of the companies I am connected with had money laid in currency in a certain foreign country and a complete embargo as to forwarding money to that country was made," he said.

"By mere chance this company came in contact with a professor of anatomy who was importing for vivisection purposes live frogs from this particular country and the change was made from currency to frogs."

"Could anything illustrate more clearly the lengths to which business men have to go today in order to carry on?"

An Elaborate Ceremony

The actual speech that His Majesty reads from the Throne is made in a certain foreign country, on the day of the coronation. On the day before Parliament opened, the Prime Minister reads the speech to all His Ministers after dinner at 10 Downing Street, London, England.

The mover and seconder of the Address are always present and everyone is in full dress. The Prince of Wales also sometimes attends.

Simple and Sure—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment, only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Oldest Man-Made Article

A necklace of green-glazed Attic beads, now in the possession of the Egypt Exploration Society, is said to have been made more than 6,500 years ago and is considered the oldest man-made thing on earth.

Don't Let Foods Go to Waste

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-San Heavy Waxed Paper.

Your grocer, druggist or stationer should have them in the department where you buy your sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form, look for Apiford's "Centre Full" Packs.

Apiford Paper Products Co., Ltd. HAMILTON, ONT.

Headache Relieved without Dosing

Vicks VapoRub, rubbed on the temples, relieves headache, cold, and all other ailments usually relieved by dosing.

VICKS VAPORUB OVER 5 MILLION JARS USED YEARLY

Would Require No Motor

If Airship Built On Principle Which Birds Use

After twenty years of study of the flight of birds, J. H. Montgomery of St. Gabriel has apparently solved the secret of the flight of birds. He has discovered that in the wings of every soaring bird is a power plant, which the bird has nothing whatever to do further than his ability to control it. Montgomery said: "Contrary to the prevalent view of scientists, birds do not fly by taking advantage of air currents, but by the power of the bird's own muscles."

"According to Montgomery, the same principles by which birds soar could be applied to a new type of airship, which would require no motor, but could be regulated to fly at any speed up to 300 miles an hour."

Persons have been inventively chosen by discerning women. Delightful to use. Subtly fragrant. Cooling and refreshing. Imparts a rare youthful charm to the complexion. Invaluable for its fragrance and making the skin as white as milk. Tones and stimulates the skin. Useful for the family also. Protects the tender skin of the child and is excellent for the father as a skin restorative and cooling shaving lotion.

An Unusual Accident

Needle Two Inches Long Driven Into Man's Head

That Edward Sell, 45, of Hays, England, carried a needle in his heart for more than four weeks has been revealed by X-rays. Sell was working on an aeroplane when a needle in the apex of an upholstery was driven into his breast. It was considered too dangerous at the time to operate. Four weeks later an operation was tried, but had to be stopped before the needle was removed. Sell died soon afterward, and a needle two inches long was found in the left ventricle of his heart.

Protecting the Children

Playgrounds are provided for the children of Salford in the most crowded areas in 102 streets which are closed to motor traffic. The result is that the number of fatal street accidents to children have been cut down to almost half.

Drunk (looking over the bridge) — Shay, officer, fish that the moon is made of.

Officer—Yes, it is.

Drunk—Then, how did I get up there?

Pennsylvania imports four-fifths of the lumber it needs.

Great Possibilities In Quota System

Views of British Milling Head Critic
Charged by John Westcott, president of the National Association of British and Irish Millers, that the Federal Government's wheat quota system was "unconscionable, unjust and ill-considered" brought criticism from Dr. W. W. Swenson, professor of political economy at the University of Saskatchewan, in an interview at Toronto.

Canadian wheat exporters had never controlled the output of Canadian grain to an extent which would allow them to cause an increase in British market prices, he said. Allegations to that effect were, he declared, merely an effort to overshadow the attempts of British millers to undercut wheat prices.

"There are great possibilities in the wheat quota system and in regard the strictures of Mr. Westcott are unreasonable and unfair," said Swenson.

"It is not surprising that Mr. Westcott has launched this assault upon the quota system, because for some considerable time the powerful British milling interests have been working behind the scenes to devise a plan to limit the importations of Canadian and other Dominion flour."

"Mr. Westcott's remarks about the alleged attempt of Canadian producers to victimize the British consumer are entirely beside the point in question," he continued, referring to a letter which charged that the British millers had called for Canada two years ago had "withheld her supplies of wheat to a large extent in the name of security."

"Following Mr. Westcott's views, he evidently thinks that Argentina and Soviet Russia have afforded better examples of wiser and fairer trading. Yet Argentina has passed through a revolution as a direct consequence of her policy, jeopardizing about \$5,000,000,000 of British capital in that country, while Canadian farmers lent the full weight of their support to British interests in Argentina, industry and British trade, and to Russia, Mr. Westcott's solicitude for open trading will not be reconciled with acclaim by the British agricultural class which has been reduced to the brink of ruin by the Russian famine."

"Butter and other farm products," he said, "are not sold on a quota basis."

How to Keep Going

Secret Is Not To Lose Interest In Life

The one fatal thing in life is to lose one's interest in it, and this is where the specialist, the man of one set of interests only, seriously handicaps himself in life's adventure. The Humanist alone, taking the turn of his widest sense, seems to have the key. "The vital force that keeps man going is not solely physical and material. It is spiritual as well, a certain ethical and intellectual attitude to life."—Sir Reginald Rhineland.

Should Adopt Canadian Way

Indis and South Africa Could Handle Communion Better

If India and South Africa adopted the Canadian attitude toward Communism and declare it illegal, those two nations of the Empire, particularly India, would be subject to less internal trouble and discomfiture, according to Rev. Thomas Mahon, of London, England.

Mr. Mahon, who was in Toronto lecturing under auspices of the women of St. De La Salle Auxiliary, has spent many years travelling about the Empire, and described scenes he had witnessed in India that discredit the country as being civilized.

Gandhi he described as a saint inflated with his own importance and an overpowering sense of vanity.

"But saints are of a queer breed in India," he said. "One man whom India hailed as a saint, obtained his worshippers by covering a distance of 1,800 miles on hand and knee. Another saint was a man who sat on a pedestal with his left arm extended in the air for five years. Really the only thing like I've seen in the United States among the tree and flag-pole saints."

"Instead of the Brahmins, England should have educated members of the agricultural class. Then the country would have developed into English India, a clean country."

"Gandhi and his followers have done nothing to improve the condition of the untouchables. Their main endeavor is directed against British rule. And it is this British rule that would have had irrigation systems, her railways and bridges, saved her from famine, disease and internecine wars."

War Debts

Peril To World

Solution Of Problem Urgent Opinion Of General Smuts

Necessity for a final solution of the world debt problem is extremely urgent at the present time, said General Jan Christiaan Smuts, leader of the opposition in the Union Government, in an address at Cape Town, South Africa.

"Germany defaults on her debts Great Britain is bound to follow sooner or later, and the fact had better be faced in time," he said.

"There is no use continuing this illusion of international debt and repatriation payments which has upset international finance and poisoned international relations," he declared.

"The time has come to end this dangerous farce. If we don't end it we may have social upheavals in which more than reparations and international debts may go by the board."

Cleaning Out Couch Grass

One Of Hardest Problems Farmer Has To Tackle

The eradication of couch grass, otherwise known as quack, twitch or scutch grass, is one of the hardest problems with which the farmer has to deal. Few people realize the enormous quantity of couch grass roots which exist in infested soil. Tests conducted by the Central Experimental Farm at Ottawa, show that weights of roots ranging from 1,331 to 6,971 pounds to the acre—as much as a heavy crop of hay. No wonder it is hard to clean out when it spreads by roots as well as seed.

Thoroughly cleaning out of the roots is the one effective way of getting rid of couch. In small areas this may be done by hand. In larger areas by shallow ploughing and working thoroughly with the cultivator to keep the roots turned up to the sun long enough for them to "kill." Only as large an area can be thoroughly cleaned out at one time should be undertaken, as half-way measures are only lost time and effort.

Left Good Example

Laurier Was Great Man Because He Served His Country

Mr. Wilfrid Laurier died yesterday a name as one of the great men of his country. It wasn't because he made money but because he served Canada.

Visiting the place where he lived in his early days as a lawyer, Archibald, Quin, a writer found "all whom I met where Sir Wilfrid was best known and loved, united in saying that he carried little or nothing for money or material things, but lived in the mild and in the spirit. In this purity we are greatly in need of emulating his example in these days, when so many of our material idols are toppling to the ground in ruin and confusion."

In the search for wealth which has raged, and we suppose will continue to rage as long as there is a Canada and as America, and a world, men have thought almost wholly of self. Canada with them was only a place to make money. Quin, a writer found with Laurier a country to serve. We are not deprecating personal wealth that is treated as a trust to be used for the building up and betterment of the country, but that wealth which is hoarded and is the idol of too many men. Laurier's example is far from ethical in the sense of obtaining and using, isn't making Canada any better or enabling the possessor to enjoy the good estimation of his fellows. A lot of Canada's recent financial miseries are due to the greed of men, the methods of a class whose concern for Canada is nothing but whose selfishness is largely responsible for many of our present problems. Laurier thought of other class will be forgotten before the earth is spread over their carcasses except by those they have ruined by their grasping, greedy methods.—Lethbridge Herald.

Greenland Air Route

Not Yet Practical Absolutely Reliable Engine Needed To Surmount Blizzards

Regular air routes from Europe to Canada over Greenland and the far northern trail are impractical until engineers construct an absolutely reliable engine. This is the opinion of G. W. Watkins, leader of the British Arctic Air Route Expedition, who spent 16 adventurous months in Greenland studying meteorological and topographical conditions.

"We had not one week without a blizzard making flying impossible," said Mr. Watkins. The blizzards, however, were confined to the lower strata and planes equipped for high flying probably could escape them.

The machines would have to be equipped with three or four engines of a minimum speed of 200 miles an hour. Flares and emergency gear for landings were not much more to be carried, said the youthful Arctic explorer.

Brave Long Winter Night

Ekimko Children Will Play Outside Regardless Of Time

Ekimko children who have endured the long continuous winter night will play outside regardless of time in the midnight sun, until they fall down exhausted, writes Douglas S. Robertson in the Toronto Evening Telegram.

Miss Learmonth, of Calgary, has been spending the past few weeks in town visiting her parents, Mr. and Mrs. A. J. Learmonth.

Friends of Mrs. McCreary will be pleased to learn that her condition is now greatly improved and that she is making satisfactory progress at the hospital.

The regular monthly meeting of the Ladies' Auxiliary to the Legion will be held in the armory on Tuesday, Feb. 2nd, at 2:30 p. m. Mrs. J. Hope will be the hostess.

The annual ratepayers' meeting will be held in Cliff Hall on Friday evening of this week commencing at 8 o'clock. The financial statement will be presented for both town and school and the several officials will give a review of the work in the several departments.

The annual meeting of the Harvest Vale School District was held in the school house on Wednesday afternoon. The report of the chairman and secretary which showed a favorable balance, was adopted. The ratepayers decided to have the school opened on April 1st and the board has engaged a teacher.

While engaged at his work at the Brick & Coal mine last week end, Savvy Thompson met with a nasty accident. His right leg caught between two cars and the pressure broke one of the bones in his leg. Mr. Thompson is still in the hospital but is progressing favorably.

Alberta Potteries Limited

OFFICE, Redcliff, Alberta

Authorized Capital 750 Shares without

Nominal or Par Value

Present Issue: 200 Shares at \$50.00 Per Share

The prospectus dated the 22nd day of October, 1931, relating to the above issue to which intending applicants for shares are referred, has been duly filed with the Secretary of State of Canada, Ottawa, Canada.

The directors of the company are: Jesse Wyatt, of Medicine Hat, Alberta, Pottery Superintendent; Cecil T. Hall, Druggist; John Thomas Caine, Murer; and James Baldray, Mechanic, all of Redcliff, Alberta.

Copies of the prospectus may be obtained at the office of the company on applying in person or by letter to Mr. J. W. Wyatt, the Secretary, addressed to box 77, Redcliff, Alberta, or 603 Seventh Street, Medicine Hat, Alberta.

The said prospectus gives the particulars required by the Companies Act, being chapter 27 of the revised Statutes of Canada, 1927, and mentions other particulars relating to this company.

On the basis thereof only applications will be taken this advertisement not being intended to be a prospectus within the meaning of the said Companies Act.

A Gentlemen's Game

BILLIARDS has earned this sobriquet because it is clean, healthy, exhilarating and sportsmanlike. Play a game of billiards with your friends on modern Brunswick equipment in the comfort of our Billiard Hall, and you easily comprehend this statement.
